

# Portfolio

## HEADLINES

I spend many years working in a company of social applications, HiperSocial, so, big part of my portfolio focus on the work I did inside this company.

## PORTFOLIO

### Free software jobs:

- Brazilian Portuguese Qt module translation to KDE Project
- KDE Announcements translation to Brazilian Portuguese.
- Creation, maintain, and leadership of a Linux distribution, KinuX Linux (<https://web.archive.org/web/20120501103116/http://kinuxlinux.org/>)

### Computer programming area:

- KinuX Project installer, “Copier”, made with C++ and Qt
- Starting of the “Candy” Project, a universal package management system, made with C++, and some Python glue.
- “SentidoDePensar.com”, a “social network” for writers, wrote in Python, with Tornado, and PHP with CodeIgniter in its original version.
- Orkut application “SentidoDePensar”
- Built a web interface for a car monitoring system at StayTrack, using PHP, with JavaScript, and Google Maps API
- Orkut Applications (made at HiperSocial):
  - o Vou, não Vou
    - ♣ Integrated the backend system, with a “paid” chat system (123chat).
  - o Chat, Bate-Papo
  - o Meus Momentos
  - o Caderno de Questões
  - o TVZ (from Globo Television)
  - o Among others
- Facebook applications (made at HiperSocial):
  - o Vou, não Vou
    - ♣ Became “Pessoas Interessantes”, then “Pessoas.vc”
    - ♣ Android mobile application mobile “Pessoas.vc”
- WebChat system, with WebSocket, Python and Tornado to “Pessoas Interessantes” application
- File Storage System, with PHP, created from scratch, with multi-server support, database centralizing information about the files, image treat at the upload, upload with web form, and with a flash plugin.
- POS System, PaygatePOS.com, wrote the core bases, and the C++ with QT POS

### CMS:

- Drupal
  - o Theming
  - o Module setup
- Wordpress
  - o Theming
- Joomla
